

1. Click on the message “Click here to activate embedded block.”

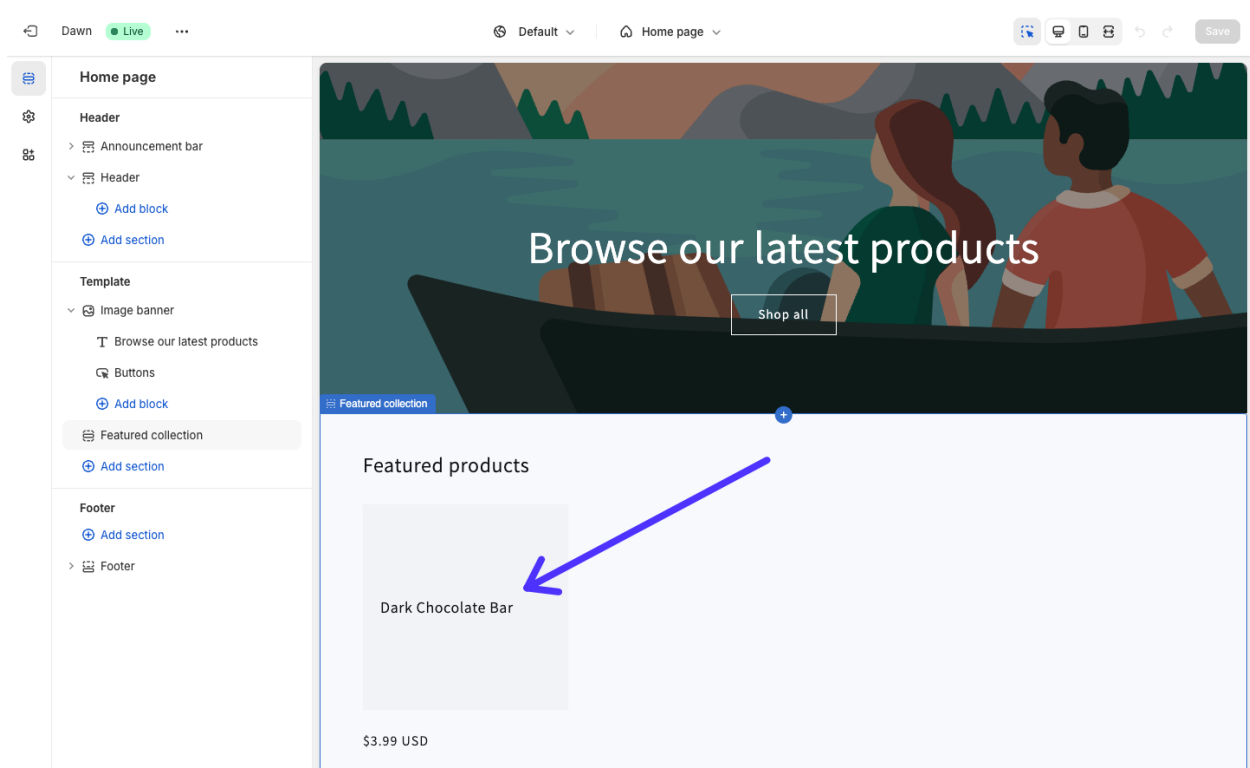

2. Toggle on the Revlytic app

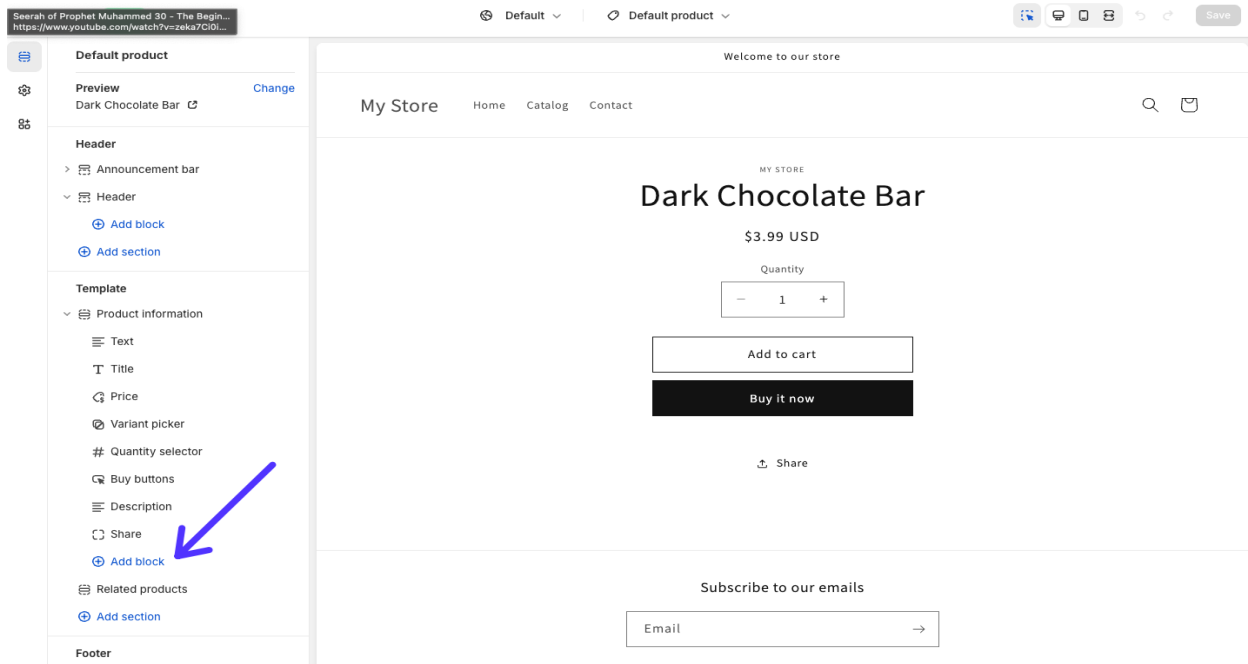

3. Click on Save at the top right of the page.

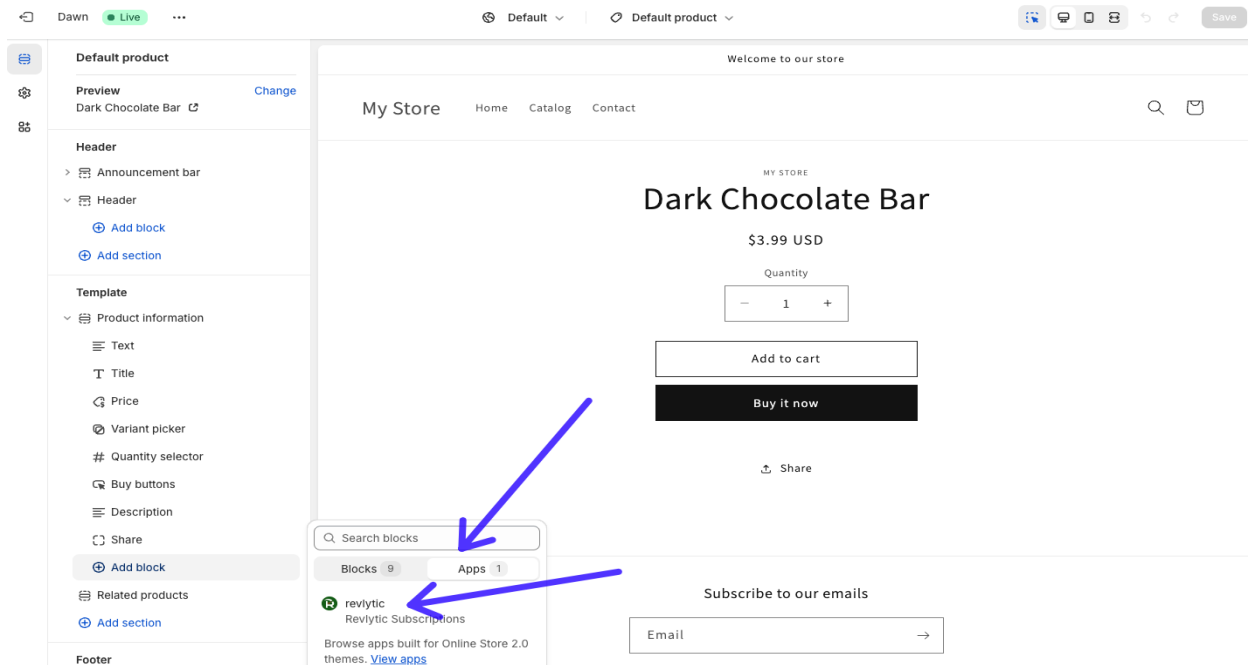

4. Double click on any of your products in your store.

5. Once you are on the product page, click on “Add Block”

6. Click on “Apps” in the block shown below and then click on the Revlytic icon.

7. Click “Save” at the top right of the page. The Revlytic app widget is now added as a block on your product page. This will extend to all your active products.

About this block

This is the example for the position of the Revlytic icon. You may now check the storefront product page for plan selection that you've added the app block here.
